

## Mp3 Carl Saffira - Dancing Water

[DOWNLOAD HERE](#)

The Carl Saffira Ensemble has pioneered a path to NEW AGE music by digitally modulating natural acoustic instrument sounds to bring both fascinating and a unique relaxation and healing affect. 13 MP3 Songs NEW AGE: Healing, NEW AGE: Meditation Details: The healing powers of water are the inspiration for the compositions in this unique musical journey, though the symbolism of rain, snow, natural, springs, creeks, rapids, lakes, rivers, oceans, geysers and fountains. Through all original, the music feels strangely familiar, as if a gentle wind of memory has brought it to our awareness once again. We sense that this same wind has taken these sounds and woven them into a fabric of colorful orchestration and creative improvisations, breathing into them the essence of water, in various mixtures with earth, air, and fire. This music is enjoyable and effective both for background and for focused listening. This is because the pieces approach the relaxation factor from a different angle (employing the science of intonation and resonance). This approach frees the composer to create new, lush orchestrations and fascinating harmonies through key changes. Although the piano music in this CD was recorded from a Yamaha C4 grand piano, you will find that the sound you hear is different from what you are used to. This is because the sound has been digitally altered to resonate with your internal organs as you listen, creating a delightful soothing effect. Far from being a fantasy, this effect is based on extensive research performed by a team of French neuro-scientist, headed by the eminent scientist, Dr. Pau Nogier. ABOUT the COMPOSER: Carl Saffira was recognized as a child prodigy in music, and won several awards in composition and arranging before finishing high school. He studied jazz at the prestigious Berklee School of Music, in Boston and he studied contemporary "serious" music, electronic music, and film music at the Californai Institute of the Arts, along with master classes with musical luminaires such as Aaron Copland, William Matthieu, and Gunther Schuller. Carl Saffira draws from his extensive background in classical and

jazz music, as well as his knowledge of state-of-the-art sound engineering, to create the lush orchestrations and unique music you find on this CD. Produced by Radiance Productions; Bandon Oregon 2004 Recorded at Hearts of Space Recording Studio; San Francisco CA Gung-Ho Studio, Eugene, Oregon. Mastered by Jim Rusby
