Hauntingly beautiful field recordings transmuted into a vast language of the urban, post-industrial landscape. 5 MP3 Songs ELECTRONIC: Experimental, AVANT GARDE: Musique Concrète Details: "This series of works was created between late winter and early fall of 2007 from treated analog tape and digital field recordings. My focus for this series of workings was relatively unfocused, to be quite honest. Some of these pieces were worked and reworked many times before I was satisfied with the work and yet others came out very quickly. During the time in which I was recording these works, I was contending with a series of abrupt transitions in my life, so I spent some time wondering through the city, recording endlessly, searching for answers. I've since found that I have no answers or philosophies to provide. The outcome has yielded only these recordings and they have served as documentation for me in an attempt to preserve the memories of this time. Given that these works were constructed from the city, itself, I am hopeful that they should exhibit themselves as a sort of urban reverie." -Christopher McFall People who are interested in Brian Eno should consider this download.
