electronic and organic all at once, "jump/cut" cover a lot of sonic territory with polyrhythmic drum'n'bass beat science, shapeshifting textures of ambient soundscapes, and hypnotic downtempo grooves. 11 MP3 Songs ELECTRONIC: Down Tempo, ELECTRONIC: Ambient Details: jump/cut covers a lot of sonic territory built on the electronica aesthetic while moving their vibe towards organic sound creation with vibrant effects and eclectic samples. their "organic electronica" melds a continuum spanning styles from drum n' bass, downtempo, breakbeat, ambient, dub, trip-hop and even modern jazz compositional ideas. the goal is to ignite live elements of electronica music that are usually lost in a robotic technical execution by creating interactive melodic atmospheres, deep oscillating bass lines and pulsating backbeat drums. "jump/cut's soft and slightly experimental electronica starts with a jazz base mixed with more chilled beats and repetitive but compelling short note progressions ... constructed with ambient sensibilities punctuated dischordant interjections and way downtempo beats ... jump/cut's restrained but adventurous jazzbient, downbeated sounds are captivating and generate a mood that can be used for everything from relaxation to meditation to nighttime sexiness." four and a half stars (out of five) - Kristofer Upjohn | raves.com
