Maybe you know Lavinia Jones from earlier days doing pure Pop Music. Now this one is totally different. We didn't care about homogeneity or commercial usability. All the producers on this CD come from different musical backgrounds. Breakbeat Prod 19 MP3 Songs ELECTRONIC: Trip Hop, POP: with Electronic Production Details: Dear friends! This story began with the track which is produced together with a good friend of mine called Skizzo Franick. The track is the titlesong of a slightly macabre musical-horror-comedy, that breaks all taboos: "Das Musikill" (winning 2 Awards at the New York International Independent Film Video Festival BEST EXPERIMENTAL FEATURE" and GORDON MITCHELL BEST ACTOR IN FOREIGN FILM"). In this film Lavinia Jones plays the nurse Julia from LA, the wife of Gordon Mitchel. After many feedback from all over the world we decided to make more tracks and we put together a complete 77 min. CD with songs from artists like Skizzo Franick, Ant on Wax, Gigajazz, Audiohead and many more. This CD is special, because altogether 9 producers made 19 tracks from different musical backgrounds all with the versatile texts, compositions and fabulous vocals of Lavinia Jones. This CD is not driven by commercial intention. It is our love to music and its way of expressing feelings. Maybe we can touch yours with one or another song. The chance for that with 19 tracks is not bad :)
