Modern folk 11 MP3 Songs FOLK: Traditional Folk, FOLK: Modern Folk Show all album songs: A Life Well Traveled Songs Details: This artist was born in Toronto and moved west, after years of dreaming about living in Alberta. He has been heavily influenced by artists like James Taylor and Gordon Lightfoot; artists that sang lyrics that had meaning and depth. Usually his songs and writings are kept to himself, in celebration or recognition of the changes in life and the intricate weaving of people and their lives; like the fabric of a blanket. Ralph once worked in a psychiatric ward of a General Hospital and from that experience can put together an understanding of people and their life and the decisions that affect ourselves or each other. The lyrics have a meaning to those that have lived the words, the music is soothing to troublesome thoughts and the combination has a remarkable sense to the listener, of having been there once before. Ralph has performed the songs of others on stage and in front of audiences. Very rarely has an audience heard the words of these songs, but when they have there has been nodding heads and rich sighs from those that recognize that this road has been traveled before, by themselves also. Those that have hurt, or felt all alone, celebrated births, new beginnings or have traveled the same path as countless others, now have a partner on their journey.
