It provides fertile soil for fusing music". Indeed, the ten original tracks of this CD do justice to the word 'fusion'. Rather than being the excuse for mindless scale acrobatics, the main emphasis of the music here is on composition, revealing a wide range of diversity and understanding of musical styles. That is not to say of course that there is not enough guitar on this album to satisfy even the most hungry of connoisseurs. Playing the Athens club circuit for years with his outfit 'Bluesburger' provided a firm foothold in rock and blues, while at the same time his musical personality was continually molded by exposure to the likes of Allan Holdsworth, Frank Zappa, Shawn Lane and other giants. On the CD, one may detect traces of influences seeping through the swirling harmonies but, above all, Harry is his own man. Tracks such as the bittersweet 'Friday Morning', the masterfully architected 'Entropy' or the cinematic 'Crossroads' with its east meets west sensibilities, reveal a true and dedicated artist with a uniqueness that owes much to his Greek origins.
