Captivating performances of classical hits played on the pipe organ 9 MP3 Songs CLASSICAL: Traditional, CLASSICAL: Orchestral Details: This is a solo CD, recorded in August 2005, which showcases the newly completed organ at the Holy Trinity Anglican Church in Chatham, Ontario. It is a remarkable instrument, offering infinite musical shades within a compact 36-stop architecture. Most of the pieces are new arrangements of well-known orchestral works, recorded here for the first time. Highlights include three fantastic 'Troll' pieces by Grieg (great halloween music!), and a note-for-note transcription of the second movement from Beethoven's fifth symphony. Danses, both carefree and macabre, complete this wonderful recording of great classical music.
