Ahims is one of my favorite musical work and I'm really proud of it. I didn't want to do something I had done before and I think it is actually really different from what I normaly do. You can listen to Ahims at any time of your day. Use it as a relaxation tool or as background music for reading. Credits: All songs were composed and performed by me with the precious help of my dear friend LE Triton. Everything was done at my home studio (my bedroom in fact). Funny fact: A lot of these songs were improvised and forgotten right away so I cant even play them live Duh! Thanks milie for the inspiration, I love you from deep within! Mathieu
