Ambient electrojazz/funk soundscapes 14 MP3 Songs ELECTRONIC: Ambient, JAZZ: World Fusion
Details: JAZZTRONIX Jazztronix is music played in real time on electronic instruments, manipulating tones, loops, and rhythms on the fly to achieve an ever-changing, fascinating flow of ambience and emotion. Contemporary in feel, it still uses the language of jazz improvisation and the blues, as well as classical lyricism in its free-flowing, non-repetitive melody lines woven through funky latin rhythms. Simultaneously exciting and peaceful, it goes beyond the pale of electronica and new age to a place where the listener is drawn in and soothed, yet entertained and surprised by changes in mood and setting. Jazztronix is music of the moment, of the present time and also for some time yet to come, when we can look back and see some beauty did arise from the chaotic world we knew as our own. RPK
