Niche Modulator CGI Script Increase your order conversions and sign ups to your newsletter by up to 400 with the Ultimate Niche Marketer's Power Script. Niche Modulator is a one time install, powerful cgi script that enables you to generate on the fly headings, sub headings, site welcome messages, subscription form headings and more based on exactly the same search terms used by your site visitor when they found your site. This incredible script works with 20+ major search sites including Google, Yahoo, AltaVista, MSN, . . . Whatever your customer was searching for they'll find your site the PERFECT answer - Sneakier than Dick Dastardly but perfectly above board as far as search engine rules and regulations go. Niche Modulator offers an easy way to dramatically increase your web site conversion ratios and can literally explode your subscription rate over night. It does this by specifically tailoring your site content to match the exact needs of your visitor. How it works: By inserting a simple JavaScript code into your sales page the Niche Modulator Script will check to see if your site visitor has come from a search engine such as Google or Yahoo (plus many more). If so the script will identify which search phrase or keywords the visitor used to find your site. Using the exact same search phrase or keywords the script will then automatically generate a new page heading and an opt-in subscriber form heading. In fact anything you like! For example: If you have a niche recipe web site - when someone finds your site by searching for 'chicken recipes' the heading of your site will show 'chicken recipes' when another visitor arrives after searching for 'BBQ chicken recipes' they'll see a different heading - 'BBQ chicken recipes'. Different headings will be generated to match each individual search - No matter how small or targeted

the niche your site will appear to be exactly what people are searching for every time. You can insert the viewers search terms anywhere on the page you like Works With Subscription Forms Too - The visitor will also see an individually generated newsletter / mailing list subscription form heading. For example: If your visitor has searched for "Mountain Biking In Mexico", they will see a subscription form heading something like "Need more info on 'Mountain Biking In Mexico'? then Subscribe our Newsletter". Do you realise the power you now have? - In trials this AMAZING script has been shown to increase subscription rates by up to 400 Niche Modulator will capture phrases from all of the following search engines:- About, Alltheweb, AltaVista, AOL, Ask, Directhit, Dogpile, EarthLink, Google, Hotbot, Iwon, Looksmart, Lycos, MSN, Myway, Mywebsearch, Netscape, Overture, Real, Searchalot and Yahoo. You can also use Niche Modulator to power up your Adwords and Overture Campaigns just like the Pro's - Full details included in the installation report . . . Niche Modulator comes with a detailed installation guide - the only requirements are that your server must support Perl and cgi-bin. Take less than ten minutes to install and can be used across as many web pages as you wish from just one installation. If you sell or promote any kind of Niche Product online then you must own Niche Modulator!
