A smooth and simple piano/vocal album of jazz-influenced pop songs. 10 MP3 Songs POP: Piano, JAZZ: Crossover Jazz Details: This collection of songs was recorded in January 2008 from start to finish, one complete take at a time using a few microphones, a Yamaha grand piano, and a laptop equipped with Logic Pro 7. Let me be honest. Parts of this album often feel like journal pages set to music. I believe there is a definitive aspect of honesty in listening to songs in their purest form. My goal in this project was to express my feelings and stories in their original state, with an emphasis on songwriting instead of production. With that being said, thank you for letting me into your living room to lay my heart on the line. This record is dedicated to my cat, BD. People who are interested in Jamie Cullum John Legend Jon McLaughlin should consider this download.
