Dark, melodic, clinical electronica 10 MP3 Songs ELECTRONIC: Experimental, NEW AGE: Ambient
Details: Joel Tallent started out as an MC, rhyming over beats since his days as a high school senior in 1987. After discovering electronic music around 1992, he dropped the mic and began experimenting with atmospheric compositions and beats. "Shuffling Data" is the first full-length album resulting from those experiments. It has received very positive reviews from numerous electronic music publications including Grooves Magazine, Zero Magazine, Outburn and Barcode. If the CD is out of stock, check Apple iTunes or MusicNet. Thanks!
