

Mp3 Mychael John Thomas - Love Songs For The 21st Century

[DOWNLOAD HERE](#)

80's flavored power pop with some heavy rock overtones 10 MP3 Songs POP: 80's Pop, ROCK: Progressive Rock Details: Mychael began playing guitar at age eleven, and by age fourteen he was playing various club circuits all around the Southeast. Three years later at seventeen, he recorded and released his first album with his band, Felt, which consisted of friends from the North Alabama area. The album achieved regional success on the east coast; however, the band dissolved after only a brief tour. In 1978, Mychael signed with Tree Publishing (now Sony/ATV) as a staff writer, where he met producer Cliff Williamson. Together they produced one album for RCA Free Flight Records, titled NEON DREAMS, which was released in 1979. This album also achieved moderate success, but no hit single. It was, however, the largest monetary deal in Nashville history at that time, and the title song, "Neon Dreams," was a top ten hit in San Francisco for eight weeks. "The Life Sonata," the first ever composition for Rock Guitar Orchestra, received a mention in GUITAR PLAYER magazine and still gets airplay in Japan and Europe. In 1980, Mychael moved back into the session scene. For the next seven years, he worked with various artists in New York and Nashville. He also worked at Opryland during that time writing, producing, and playing in the live rock music shows. He was a staff writer for Multimedia Entertainment (producers of Phil Donahue) and wrote the music for "The Great American Music Video," a children's special that aired on NBC. In 1987, Mychael committed his life to Jesus. He began a free tape and CD ministry specializing in Christian rock music. He worked in youth ministry for ten years, including two one-year stints as a youth and music minister. He continues to serve in the music ministry of his local church. Since 1988, Mychael has been a private music teacher. He has also spent five years as a college instructor teaching guitar and recording techniques. He is currently teaching in his own music shop, and he owns and

operates a digital recording studio. He owns a record label called THOMASTONE RECORDS, INC. and has released several CDs of his own work. Mychael is not only a talented musician and producer, but he has also become a prolific writer. He has written articles for local papers and magazines throughout his career. He has recently authored a science fiction novel titled FREEDOM FIRE, which includes complimentary music performed by his GUITARORCHESTRA. He is currently working on a sequel to FREEDOM FIRE and has plans for a series of instructional books, including instrumental, vocal, and music theory. All of Mychaels books and CDs that have been released are available on his website. If you would like to find out more about Mychael or his products, you may write to mjt@mychael-neondreams.com. Mychael is interested in people, returns all correspondence personally, and says "THANX" to all who have enjoyed and supported his artistry over the years. Tell a friend.
