My music is old school but a little of today's grooves something every age group would like 12 MP3 Songs
EASY LISTENING: Love Songs, URBAN/R&B: Rhythm Blues Details: I am Virginia native, born and raised I've had a passion for music all my life, I've never had the opportunity to go to school for music, I always wanted to write my own music and sing/play all instruments on the album, recorded and mixed everything, for each song. When I was a young teenager I played in a group called Capital Punishment, wow what a name for a band we were good, we played at high schools, some colleges, clubs, etc. During that time I was inspired by a world-known group called EARTH WIND and FIRE, it was then that I wanted to produce my own album, I am married and I have a daughter and son, I thank GOD for the gift to be able to imagine and dream to create songs and the music, I hope that my music will have something for everyone to listen and enjoy, I am an originalist and I believe that my music is different, my style is also and I want the world to know that RW got out the box.
