This song doesn't help you chill, it is chill. The vox go right through you and you can feel it, but it feels good. The bass is stand-out and really helps to bring the track together. The vibe is so simple, but at the same time it's super hot! This kind of feel in a song is rare, but it's such a good rare! Keep up the awesome work!

At first it sounds more R&B and then shifts a little jazz in and then the hip hop feel. I enjoyed it. -Townsend, Massachusetts I like the mood here alot. This is pleasing to the ears... the way the instruments ll fall in and out of each other is amazing. The drums are... exactly what the song calls for. The mix is even perfect...the instruments... exactly where they should be. Subtle genius im sold - Anias19 from Garden City, Michigan Aahh! A great tune for once. Great dynamics without exhaust. The mix? As fine as the production - this jazzy feeling with an electronic wobble, I wouldn't know wether I'd meet the dancefloor (I'd definitely would if the rhythm section was a little bit more 'present') or the lounge. The singer contributes much to the balancedness of the tune. The sonor voice makes it very relaxed/relaxing, as well as the controlled play of the drummer, respectively the band as a whole. the breaks give this tune it's extra, great! - Khelili from Luzern, Switzerland Really? Do you really want to know????????..... SHE'S AWESOME! I could listen to this all night... beautiful harmonies too...
