21st century Beatles. 11 MP3 Songs POP: Beatles-pop, POP: British Pop Details: I start with a story my sis told me when I was twenty or so. Sis told me that Mum saw me one day rocking to the music playing on the family stereo and Mum said to sis that I would be a musician one day. Mum never lived to see that day , she was suddenly killed months later. I say no matter how long you live, if there is still breath in your lungs, follow your dreams. Make it happen! I was born in a Midwestern town southwest of Chicago. Evergreen Park, Illinois. After Mum died Dad remarried a year later and cemented the union by adding another child, making the grand total of children 9, and making us the unofficial"Brady Bunch"! Dad was a athlete as well as actor, he loved to sing and generally be a " Ham" My biological Mum was a artist,Mum painted, teacher and a classical pianist. I heard she played well. Dads ancestry came from Ireland and Germany. Mums from Great Britain and Germany. Well I absconded all the records the sibs left when they left for thier college studies. The Beatles are the band I loved most. I started by emulating the ways they sang and played thier instrument. Formed several Beatle bands and began in ernst to write music about 18 or 19. My fave was John , he had a knack for saying and doing things that drew attention, just being himself. I was a lot like that, still am. Be Like You is a collection of original music with a Beatle influence. Give it a spin and see! There are also some songs about my divorce and one song to my daughter Alyssa. Painful as it was I said what i needed to say and moved on. I hope you enjoy listening to the music and appreciate the taking the time to read my life as well as listen to my songs. Cheers ,Gday, Will Weckel
