

Finite Geometries, Groups, And Computation

[DOWNLOAD HERE](#)

This volume is the proceedings of a conference on Finite Geometries, Groups, and Computation that took place on September 4-9, 2004, at Pingree Park, Colorado (a campus of Colorado State University). Not accidentally, the conference coincided with the 60th birthday of William Kantor, and the topics relate to his major research areas. Participants were encouraged to explore the deeper interplay between these fields.

The survey papers by Kantor, O'Brien, and Penttila should serve to introduce both students and the broader mathematical community to these important topics and some of their connections while the volume as a whole gives an overview of current developments in these fields. EAN/ISBN :

9783110199741 Publisher(s): De Gruyter Discussed keywords: Finite Geometrie, Gruppe (Mathematik)

Format: ePub/PDF Author(s): Hulpke, Alexander - Liebler, Robert - Penttila, Tim
