Mp3 Gk, Rikki, Jasz, Annette, Brennon - Geek Rhythms

[DOWNLOAD HERE](#)

Hip Hop, Rap, Pop and techno music overlayed onto Technology lyrics. 8 MP3 Songs HIP HOP/RAP: Hip Hop, POP: with Electronic Production Details: The idea for this music CD came spontaneously - combine music and technology discourse and what better music to present it than rap and other rythms. The premise is simple, to introduce the Geek world to non-Geeks and inject the technical matter with some levity that it deserves. I hope you will enjoy the CD for the music and the lyrics. Rikki is the brains behind musical interpretation of the lyrics, composed and mixed all the songs. He also has support vocals in this album. His enthusiasm and energy enriched this project many-fold. He has been playing music professionally since 1996 and has 3 music albums to his credit. Lead vocals belong to Jasz Kohli the quintessential singer and baby of the Geek Rythms team. He is a Electrial Engineering freshman and has been perfoming in public since the age of 6 and has several releases and performances under his belt. He brought in his own interpretations of the lyrics and enriched them. Supporting vocals in the song, Computer Geek have been provided by Annette Phillips. GK wrote the lyrics for all the songs in one inspired burst of techno-poetry effusion in Jan 2004. GK is an Engineer by education and holds a PhD in Chemical Engineering and the only one who has held a day time job.
