The debut jazz album from Jonny Blu brings a "new standard for a new generation of jazz." With a mix of original tracks and a dash of standards, his music, vocals and lyrics evoke the emotions of the classics, but with a cool contemporary flavor, Cheers. 11 MP3 Songs JAZZ: Jazz Vocals, POP: New Wave Details: Jonny Blu is the one of the only Jazz singers of his generation who not only sings the standards, but he also writes, composes and produces his own "new standards". Unlike most of his contemporaries, all the songs you'll hear on his upcoming album (other than a few stylish covers) are written and composed by Jonny. His music and lyrics evoke the emotions and nostalgia of the classics, but at the same time give a contemporary feel to a whole new generation of listeners. He grew up in Los Angeles and was from an early age exposed to Sinatra, Dean Martin, Bobby Darin and the rest of the Jazz era gang. But, Jonny has looked to create his own sound unique from his predecessors. His smooth and cool vocal style is reminiscent of some of the greats from the past, but his sound is unmistakably his own...so if you like the greats, then you're gonna love Jonny Blu! A longtime veteran of the music business, Jonny is bringing a fresh face, a new sound and the new standards to the next generation of Jazz!
