

Mp3 The Concaves - Warning, Heavy Surf Advisory

[DOWNLOAD HERE](#)

Driving reverb-drenched heavy surf music with soulful waves of explosive energy that capture the true spirit of modern surfing. Original surf guitar stylists conjuring up visions of clean, glassy, tube rides. 11 MP3 Songs ROCK: Surf Rock, METAL: Instrumental Metal Details: The Concaves; a heavy metal-progressive surf rock band from Santa Cruz California. Taking metal music to a fresh unriden spot. What is a concave?. It is a large, steel blade shaped with a curvature for threshing, slicing, and harvesting. It is also the shape of everything to do with surfing. The surfboard, the surfer, the wave, even the ocean itself if your underwater. The concaves are musician-surfers who are slicing traditional surf music and molding it into modern 'new wave' sounds. The album, 'Warning, Heavy Surf Advisory', is getting airplay worldwide as we speak. The music is slowly taking hold of people's attention everywhere. Radio station by radio station. Stereo by Stereo. More reverb, heavy guitars not unlike Angus Young and Slash, Hard picked and double picked melodies like Metallica. Moving and moody like Pink Floyd. Some reviewers say the band is like a collision between the Ventures, Pink Floyd, and ACDC. Yeah! That's it! There is a review of the cd at surfrockmusicand watch for a upcoming review in 21st Century Guitar Mag. Now order your copy of 'Warning Heavy Surf Advisory' now.
