Electronic pop 14 MP3 Songs ELECTRONIC: Dance, POP: New Wave Details: My, how time flies. It seems like almost yesterday that Synthphony Records released, "Synthphony 2001: Russian Strike" featuring the techno-laden skills and mad beats of Russian based producer, musician and remixer, DJ RAM. His intoxicating effect upon the electronic-pop scene's heaviest hitters such as Nocomment, Red Flag, Echoing Green and Sara Noxx seduced a legion of new fans and turned quite a few heads both in the U.S. and internationally. We proudly present Volume 6 of the Synthphony REMIXed! series. This time we suggested that a variety of established and newcomers be approached for the DJ RAM treatment. As usual, he had no problems securing a host of familiar (Psyche, Freezpop, !distain, Blue October, Neuropa etc.) names and several rising stars (Bobby, The Promise, P24 and Hungry Lucy) smattered with a healthy dose of side projects and edgier acts. The result of these unions, obviously, is in your hands. After reviewing these newest creations, we're certain that his popularity will only continue to soar and look forward to following his career, especially seeing his name in marquee lights headlining next to the names of the world's most famous DJ's.
