Trip-Hypnotic Cosmic Folk is the sound that drives the lyrical madness. Caution... Album contains Hypnosis and Subliminal messages that may increase breast size, and/or social awareness. 14 MP3 Songs ROCK: Math Rock, FOLK: Modern Folk Details: Hello, my friends call me Conspiracy Freak. Let me take you on a genre genome splicing musical journey! The root of these songs were written on my acoustic guitar, but from there they disperse in many different directions. I can guaranty that lyrically and musically these songs are like nothing you've heard before...how do I know this? Because they originated from my soul (and no one's soul is like mine, thank God)! You'll be hearing Trip-Hypnotic Cosmic Folk border-lining on hippy-hop...with a dose of humor and paranoia thrown in for good measure. In refutation to the commonly held belief that members of "generation X" lack initiative, focus, and a strong foundational grasp on reality, Conspiracy Freak is here to point out that this is a ploy, "THEY ARE ALL OUT TO GET US," they want us to conform so badly that they must insult our entire generation just to strike fear into us. So, as a generation, we are in need of an outlet, a forum, a space where creative ideas can be expressed, collaborations can be made, and we can exercise our free speech in a matter both accepted and repulsed by the mainstream. Because, as you may or may not agree (depending on your level of assimilation) our generation's lack of initiative is merely a lack of what preceding generations held of value (for instance, a full-time, soul-sucking back-destroying job) and we have focused on what we value (freedom to be an individual, to explore, to read as you will, and to sleep in on Mondays). Anyway, keep an eye out, and remember, "they don't want you to know the issues and musical content that is expressed in this music". Disclaimer: "All quotes are used out of context." Jeremy Asay
