Toronto Hip-Hop from a funny dude over dope beats. 17 MP3 Songs HIP HOP/RAP: Hip Hop, HIP HOP/RAP: East Coast Details: [For current news, drop by [magomus.com/pig/](http://magomus.com/pig/) ] Chances are that if you're visiting this site now, you already know who we are. However, we should still lay down the basics for any newcomers that may arrive. My name is ear2ear and Pig is an emcee who I lay down tracks with. Our brand of hip-hop can best be described as.....sheeit, I got no idea. My beats are typically a little laid back and Pig's rhymes are the perfect balance of wit and comedy. We both have other gigs we're working at, but we come together every once in a while in order to bang out something nice. So let's recap: Pig rhymes and I make beats. So we began making music as an additive to a series of mixtapes me and Know ID were doing back in high school and it evolved into something a bit bigger. So rather than just sitting on our asses, we decided to put together a little album and to release it to the masses. Nobody's trying to get rich or "blow up", we just want to share what we think is some good music. And our extensive polling proved that 93 of people sampled agreed that it is good music, while the other 7 believe it is at least adequate music. 93 of something can't be wrong! The album is called, "In Session" and is being put out through Magomus Sounds (Toronto, Canada). It consists of ten original tracks plus an additional 5 bonus tracks. Some guest artists who creep up are Syntifik and Kawzee. I hope yall enjoy it.
