Original piano compositions, played beautifully, with heart. 10 MP3 Songs in this album (52:03) ! Related styles: NEW AGE: Solo Instrumental, NEW AGE: Neo-Classical People who are interested in George Winston Claude Debussy Jim Brickman should consider this download. Details: This is one of the best solo piano recordings I am aware of. It was recorded when Sarah was 18 years old, and contains material she wrote between age 12 and 18. Don't let her age fool you. Even at this age, she is a true virtuoso on piano and composition, and plays on this recording with a full hearted abandon that I feel very lucky to have captured. Now, 8 years later, she is out of college, composes music for TV and movies, makes great recordings of her newer singer/songwriter music, and is carving out a successful career in the music industry. This recording is a rare chance to hear the formative and beautiful work of an artist that will eventually become a household word. Enjoy!
