

Processing

[DOWNLOAD HERE](#)

Processing is a programming language and environment for people who want to create images, animations, and interactions. It has evolved into a tool for generating finished professional work. Today, there are tens of thousands of students, artists, designers, researchers, and hobbyists who use Processing. Interactive programs using 2D, 3D or PDF output OpenGL integration for accelerated 3D For Mac OS X, and Windows Projects run online or as double-clickable applications Over 100 libraries extend the software into sound, video, computer vision, and more... This is for a windows 64 bit
