

Thermodynamic Formalism And Applications To Dimension Theory

[DOWNLOAD HERE](#)

Preface.- 1 Introduction.- I Classical Thermodynamic Formalism.- 2 Thermodynamic Formalism: Basic Notions.- 3 The Case of Symbolic Dynamics.- II Nonadditive Thermodynamic Formalism.- 4 Nonadditive Thermodynamic Formalism.- 5 Dimension Estimates for Repellers.- 6 Dimension Estimates for Hyperbolic Sets.- III Subadditive Thermodynamic Formalism.- 7 Asymptotically Subadditive Sequences.- 8 Limit Sets of Geometric Constructions.- 9 Entropy Spectra.- IV Almost Additive Thermodynamic Formalism.- 10 Almost Additive Sequences.- 11 Nonconformal Repellers.- 12 Multifractal Analysis.- Bibliography.
EAN/ISBN : 9783034802062 Publisher(s): Springer, Berlin, Springer, Basel Discussed keywords: Dimensionstheorie, Thermodynamik Format: ePub/PDF Author(s): Barreira, Luis
