

Modelling And Monitoring Of Coastal Marine Processes

[DOWNLOAD HERE](#)

COASTAL MARINE ENVIRONMENT: THEORY AND MEASUREMENTS- 1. The coastal ocean- Y.R. Rao, C.R. Murthy and P.C. Sinha - 2. Introduction to transport phenomena- G. Jayaraman- 3. Coastal marine diffusion processes- C.R. Murthy and Y.R. Rao- 4. Measurements of currents in the coastal ocean- J. Bull and Y.R. Rao- 5. Remote sensing applications to coastal oceanography- P.C. Pandey, Raj Kumar, A.K.Verma, A.K. Mathur and N. Chaturvedi- COASTAL MARINE POLLUTION- 6. Coastal transport and dispersion modelling- Y.R. Rao and C.R. Murthy- 7. Modelling of circulation and salinity in estuaries- P.C .Sinha, Y.R. Rao ,A.D. Rao and S.K. Dube- 8. Modelling and measuring sediment transport in lakes- T. Huttula- COASTAL MARINE HAZARDS- 9. A real time storm surge prediction system for the east coast of India- S.K. Dube, A.D. Rao, P.C. Sinha and P. Chittibabu- 10. Prediction of tropical cyclone tracks in the North Indian Ocean- U.C. Mohanty and A.K. Gupta- 11. Risk analysis for oil spillage in marine environment- M. Mohan- COASTAL MARINE POLICY/MANAGEMENT- 12. National legislation and international conventions relating to marine pollution- B.R. Subramanian - 13. Central considerations in initiating and operating programs in integrated coastal management - Biliana Cicin Sain and R.W. Knecht- 14. Geographical information systems for integrated coastal resource management- Md. Rais- 15. Integrated coastal area management - the case of India- G. N. Swamy EAN/ISBN : 9781402083273
Publisher(s): Springer Netherlands Format: ePub/PDF
