Radio Friendly Pop Rock 9 MP3 Songs POP: Today's Top 40, ROCK: Modern Rock Details: For more than 4 years, The Nocturnal Tomatoes have been hard at work. What has been accomplished in the past is important to note but even more exciting is where the band is headed in the future. While the band continues to rock every city it can from coast to coast on a quest to bring music to everyone who wants to hear it, they also strive to gain the kind of notoriety of the great performers and artists they were influenced by as children. Now that the band is preparing to record their first full length CD of original music which is currently being solicited by local radio stations and record labels for airplay, they set their sights on a level of exposure that will launch them into a full blown national tour with possibilities even focused on the world. The style of music that is experienced at a live show is exciting for all who attend, due in part to the warm tones of the guitar and the low frequency sounds of the rhythm section, and there is no mistaking the bands uniqueness whether you are in a room or a concert venue. The power and magnitude of their presence is awesome to experience. In fact Alice Cooper was quoted on his nationally syndicated radio show as saying These guys are the next IT, and they are the best bar band in America period. Andrew Feigenbaum from Atlantic Says I love the sound I cant say anything but good about it also When you finish the CD I would like to hear more for sure .
