The Newbie Toolkit - MRR Included Building A Website Doesnt Have To Be Difficult ... Too many people let the fear of building websites and wrangling with HTML hold them back from the money they could be making -- with their own websites. Dont let this happen to you! When you have your own websites, you can start building a solid online presence that will keep steadily bringing in the cash. In fact, you can build a whole network of websites -- quite easily. And ... with a simple (and free) editor -- and easy, illustrated instructions -- anybody can build a simple money-maker website in just an hour or two. Step-By-Step Guide ... ... shows you exactly how to build web pages the easy and quick way ... and upload them to the Internet, in a flash! The Newbie Toolkit: How To Build And Upload Your First Website gives you fully-detailed screenshots, with easy directions showing you exactly how to: Get and install a simple (and free) web page editor. With everything laid out in illustrated steps, youll soon be zipping out websites like a pro. Set up the backbone of your webpage, with a controlled-width, white background for easy reading ... and a coloured surround of your choice. asily place pictures and text side by side, for a crisp, professional-looking website. Create an attention-grabbing, benefit-shouting bulleted list -- just like this one. dd clickable links to your page, with a few clicks of your mouse. Put in those links that make you money (Affiliate commissions anyone?) Even drop snippets of code into your website, in just 3 simple steps. Yes! Its not as difficult as you feared. Install an easy to use FTP program, that lets you easily dragndrop your website files from your computer onto your Internet domain. Like all Newbie Toolkits, How

To Build And Upload Your First Website shows you exactly what to do ... with highly-detailed screenshots and simple directions
