Bach. These works provide a unique vehicle of communion between musician and instrument. I have always believed that had the marimba existed during Bach's time, he would have been interested in composing for it given its rich sound and depth of musical character. As a musician in the field of percussion it was a joy for me to take the time to devote myself fully to the marimba and delve into the study and adaptation of these pieces. It is with great excitement and passion that I present this CD to you. This release represents the realization of a dream I have had for many years - it has been an amazing artistic journey! ----- Fernando Meza (Director of Percussion Studies - University of Minnesota) has performed throughout Latin America, Europe, Japan and the U.S. with a wide variety of artists and groups including the National Symphony Orchestra of Costa Rica, the Saint Paul Chamber Orchestra, and the Minnesota Orchestra among many.
