This album aspires to bring back the past and present of love and loss. A familiar but refined sound reminding us of our days gone by- had they been bad or good. 8 MP3 Songs EASY LISTENING: Soft Rock, URBAN/R&B: Contemporary urban Details: Kenjamin's music career started in 1970 at the young age of 10 years old. He would play every chance he could get his hands on his older brothers guitar and in turn, suffered the consequences every time he got caught. Oh, the lessons in life are as such! He would often sing aloud in the school playground without any demurrer or recollection of fear. The girls seemed to notice which must have meant something. The term 'such a ham' rang all too familiar then. Later, in 1975, at age 15, he formed an amateur acoustic band called THE FAMILY. I reiterate this as an amateur acoustic band with an overwhelming sense of heart. Along with seven of his closest friends, Kenjamin spent this time "learning the ropes I guess you'd say", which did in fact entail it's fair share of banging on anything around them. During this period he was able to filter through several talented musicians while building his own abilities. This resulted in forming his next group, XTR {X-it To Reality}. Throughout the event of five or more years together and all their hard work, XTR found themselves opening for major acts including Leon Russell, Paul Young, and John Butcher Axes, along with others. Hardship had no sooner struck and the band had lost guitarist/song writer Mark Garies. We'd like to pause here for a moment to say God bless you to Mark. After the severe loss of his fellow bandmate and best friend, Kenjamin moved forward to form a smaller two piece group, A J Connection, which opened his world to the meaning of folk understanding. "A good story if you may." Kenjamin spent that time moving around the Northwest to spark new true life scenarios. Expanding a new project from the prior two-piece called (Soaring Falcon). Soaring Falcon acted as an excellent soap box for the two to stand on and express themselves politically without the residuum. Throughout all of this, his family and friends

have grown considerably. These times and experiences have launched Kenjamin from 1995 to 2004 as an independent solo artist. "Dreams in the morning" consists of just a few of the many song released this year. Kenjamin writes to remind us of ourselves, on all sides and at every point of our emotional spectrum. He writes what others relate, which has long time been one of his strong appeals. We find that CD Baby helps all the artists residing here and we truly appreciate their services. Likewise, we appreciate you for supporting amazing new music. There are so many incredible musicians yet to be found, thank you for still believing in them! Buy from our talented friends here. The contribution means so much and for so little. Spread the word! - Love to my fans, my family and my newcome friends. Enjoy! KENJAMIN
