Melodiously Flavorful Conscious Rock. That would be the best way to describe Purple Sunrise and the songwriter's style behind it, Kerry. It's her life written in each song supported by trademark vocals--soulful, intense with a touch of vulnerability. 10 MP3 Songs ROCK: Modern Rock, POP: Power Pop Details: Purple Sunrise, Kerry's first solo project was created out of a strong desire to heal, find truth and gain peace. She explores the complexities of who we are as people. The freedom of her lyrics will remind you of artists such as Alanis Morissette, Paula Cole and Sheryl Crow. Her music simply covers a broader range. Of Cuban decent, Kerry Fernandez has been musical since the age of 4. Throughout her life she has performed in numerous bands as lead vocalist as well as keyboardist and bassist. The birth of her child led her to re-evaluate her music as more than just a hobby. Besides wanting to express herself through her lyrics, she knew that her writings could touch others in similar situations. "Digging into our souls and coming up with the truth---once it's in the light we can't help but deal with it", says Kerry. This album was blessed with some wonderful musicians who helped to further explore fresh direction in each song. Many thanks to Jeff Prosetti, John Putnam, John Benthall, Shaheed Shabazz, Oscar Isoba and Hiram Perez. Kerry is currently performing in the New Jersey/New York City area and is currently working on her 2nd album entitled "Being Human" set for release April of 2005.
