

Soil Stress-strain Behavior

[DOWNLOAD HERE](#)

From the contents: Preface; Foreword; Introduction: Fumio Tatsuoka; Photos; Special Keynote Paper by- Tatsuoka, F. : Inelastic Deformation Characteristics of Geomaterial; Keynote Papers by Lo Presti, D., Pallara, O., and Mensi, E. : Characterization of Soil Deposits for Seismic Response Analysis; Di Benedetto, H. : Small Strain Behaviour and Viscous Effects on Sands and Sand-Clay Mixtures; Shibuya, S. and Kawaguchi, T. : Advanced Laboratory Stress-Strain and Strength Testing of Geomaterials in Geotechnical Engineering Practice; Behavior of Granular Materials: Pallara, O., Froio, F., Rinolfi, A., and Lo Presti, D. : Assessment of Strength and Deformation of Coarse Grained Soils by Means of Penetration Tests and Laboratory Tests on Undisturbed Samples; Umetsu, K. : Strength Properties of Sand by Tilting Test, Box Shear Test and Plane Strain Compression Test; Matsushima, T., Katagiri, J., Uesugi, K., Nakano, T., and Tsuchiyama, A. : Micro X-ray CT at SPring-8 for Granular Mechanics; Saomoto, H., Matsushima, T., and Yamada, Y. : Visualization of Particle-Fluid System by Laser-Aided Tomography; Verdugo, R. and de la Hoz, K. : Strength and Stiffness of Coarse Granular Soils; Muir Wood, D., Sadek, T., Diloru, L., and Lings, M.L. : Deviatoric Stress Response Envelopes from Multiaxial Tests on Sand; Yasin, S.J.M. and Tatsuoka, F. : Stress-Strain Behaviour of a Micaceous Sand in Plane Strain Condition; Behavior of Clays: Nishie, S., Wang, L., and Seko, I. : Undrained Shear Behavior of High Plastic Normally Consolidated Marine Clays; Nash, D.F.T., Lings, M., Benahmed, N., Sukolrat, J., and Muir Wood, D. : The Effects of Controlled Deconstructing on the Small Strain Shear Stiffness of Both Kenner Clay; Fortuna, S., Callisto, L., and Rampello, S. : Small Strain Stiffness of A Soft Clay along Stress Paths Typical of Excavations; - Parlato, A., d Onofrio, A., Penna, A., and Santucci de Magistris, F. : Mechanical Behavior of Florence Clay at the High-Speed Train Station; Lanzo, G. and Pagliaroli, A. : Stiffness of Natural and Reconstituted Augusta Clay at Small to Medium Strains; Silvestri, F., Vitone, C., d Onofrio, A., Cotecchia, F., Puglia, R., and Santucci de Magistris, F. : The Influence of Meso-Structure on the Mechanical Behavior of a Marly Clay from Low to High Strains; Teachavorasinskun, S. : Inherent vs. Stress Induced Anisotropy of Elastic Shear Modulus of Bangkok Clay; Soil Viscous Properties: Sorensen, K.K., Baudet, B.A., and Tatsuoka, F. : Coupling of Ageing and Viscous Effects in An Artificially Structured

Clay; Duttine, A., Di Benedetto, H., and Pham Van Bang, D. - Viscous Properties of Sands and Mixtures of Sand/Clay from Hollow Cylinder Tests; Enomoto, T., Tatsuoka, F., Shishime, M., Kawabe, S., and Di Benedetto, H. : Visocus Property of Granular Material in Drained Triaxial Compression ... EAN/ISBN : 9781402061462 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Ling, Hoe I. - Callisto, Luigi - Leshchinsky, Dov
