

Ultimate E-cover Templates Pack + 2 Mystery Bonuses!

[DOWNLOAD HERE](#)

Get 3 HOT E-cover Template Packages, along with two Mystery BONUSSES! Listed below are the 3 e-cover template packages you will get as part of the package: E-cover Template Package 1. Software Box Cover Templates - with Private Label Rights: This is Cool Photoshop Action Script That Create Software Box For Your Site! What is a Photoshop Action Script? Actions are, in their most basic form, simply text files. That's it. Adobe Photoshop allows you to record your designs that you use over and over

again. When you record an Action and save an Action Set, Photoshop takes that text file (a list of all the commands executed in the action), and gives it a .atn file extension. Then when an Action Set is loaded and an action from the set played, Photoshop reads the text file and re-applies all the commands in that file or action to create what you recorded. So why is this so handy? If you do the same thing over and over, such as, creating a e-cover, then you save a lot of time by just playing the action (pre recorded steps) to complete a project in minutes rather than hours. What You Are Getting Here is Ready-Made E-cover Templates! Once you have the Photoshop Action loaded into Photoshop, just press the play button and a basic template is made for you, edit the colors and add the titles of your choice from the product or services you provide. Press play again and out pops the cover complete and ready for your website.

***** E-cover Template Package 2. High Resolution Ecover Templates Pack: Create Amazing Quality 3D E-Covers For Your E-cover Template Packages In Seconds - With This Brand New Set Of Premium E-Cover Action Scripts! I just created a brand new set of premium quality E-Cover action scripts that will help you do just that. And the best part is - you don't have to be a "techy" person or have any design skills at all. These brand new action scripts will do the job for you. All you need is Adobe Photoshop and a few minutes of free time! Here is how the action scripts work: Action Scripts are basically a recording of steps you take in Photoshop to create a certain effect. So if there are certain tasks that you always do in Photoshop, you can record your steps and save them into an action script. And you can later play back all of the steps that you recorded by simply playing the action script. In this case, I've recorded the steps I took to turn 2D covers into 3D covers. So all of the distort, resize, and other commands got recorded and can be played back with just a few clicks, and turn a 2D cover into 3D in seconds. So basically, you start with a blank template or a "starter template. You then create your own design. And finally you play the E-Cover action of your choice and the cover turns into 3D right before your eyes. What makes this set of actions special? * Super fast actions: Each action takes under 20 seconds to render into 3D. That means you can modify and tweak your covers much faster. * Crisp 300 DPI Resolution: No jagged edges. High resolution ready to be used for print. * Unique "looks": Even if you already have another set of actions, you won't find e-cover types like these anywhere else. * Premium quality: Great care went into creating each e-cover action script in this package. Each one is of premium quality and as good/better than anything else out there on market. * Brand new actions: These are all brand new actions created in 2011, so you'll be getting the newest and freshest "looks" for your products.

Here is what you will get in this package: 1. 9 High Resolution E-Cover Actions: You get 9 high resolution action scripts for 9 different E-covers. 2. 5 High Resolution E-Cover Templates: To make it easy for you to get started creating your own e-covers I'm including 5 premium quality high res (300 DPI) e-cover templates for each cover type. All of the layers on these templates are completely editable, so just insert your own details and you have a quality cover ready to go in minutes. 3. Video Instructions This product is really simple to use, and literally takes just a few minutes to get started. But you still get simple step-by-step video instructions to be up and running right away! BONUS: 21 Header Graphics Templates - FULLY Customizable! (PLR): This package contains 21 header templates in .PSD format and .JPEG format (blank), plus 21 sample templates in .JPEG format. These 21 headers are FULLY Customizable!

***** E-cover Template Package 3. Web 2.0 Covers - Stunning E-Covers WITHOUT Photoshop: Easily Create Stunning Covers In Minutes, WITHOUT Photoshop! The basic idea behind Web 2.0 covers is this... It's a template based system. You get 8 different templates, for 8 different E-Cover types! So you get 1 template for each cover. What makes these templates special is: -Each template has a flat and straight front cover, so you can just type your text into the template without tilting and distorting the text in any way. Very easy to use! -Each template also has some 3D elements to give it a 3D look. These 3D elements are already part of the template so you don't need to do anything extra. The 3D "look" is already there, so you don't need any other software or action scripts. In other words, you don't need Photoshop (but you can use Photoshop if you want to). -Each template comes pre-installed with 55 different "effects" that will spice up your cover. And all you have to do is check or uncheck the effect you want. This makes creating an eye catching cover super easy. -Each template also comes pre-installed with 20 different "shapes" like half circles, bars, rectangles, etc. So you break up your cover into sections and add some more eye candy to the cover easily. -Each template is highly customizable, and each part of the template comes on its own layer that you can customize in pretty much any way you want. Mix and match the effects, resize and distort anything you want, change colors, etc. So with each template, you can create literally millions of different combinations of covers. So your cover won't look like all the other covers out there that are using these templates. -This package also comes with 90 Web 2.0 layer styles. So you can easily colorize and add some gradient effects to any element on the cover with just a few clicks. These templates are extremely flexible. With them you can easily create pretty much an unlimited amount of quality looking covers, in minutes. I don't think it can get

much easier than this. Here's exactly what you will get in this package: * 8 templates (in PSD format). * 55 pre-installed effects on each template. * 20 pre-installed shapes on each template. * 90 Web 2.0 layer styles. Quick FAQ: Q. Do I need any special software? A. You need a software program that opens PSD (Photoshop files). I would recommend either Adobe Photoshop or Photoshop Elements. However, you can also use any other program that opens PSD files. You can use a good free program called GIMP. Q. Is this easy to use? A. Yes, very easy. The templates come pre-installed with all the "special effects". So all you have to do is check and uncheck some boxes, and you have a nice looking cover. Just add text and you're ready to go. ***** Here is A Summary of Everything You will Get in This Package: E-cover Template Package 1. Software Box Cover Templates - with Private Label Rights E-cover Template Package 2. High Resolution Ecover Templates Pack E-cover Template Package 3. Web 2.0 Covers - Stunning E-Covers WITHOUT Photoshop To make the deal even sweeter for you, we are even including two announced bonuses with it! Only those who purchase this product from us would be able to get the bonuses at NO cost! So what are you waiting for? Order today. 30-day money back guarantee! In case you are not 100 percent satisfied with your purchase, simply contact us within 30 days of your purchase and we will refund every penny! No questions asked!
