Beautiful and serene ambient compositions and soundscapes suitable for background music, meditation, and sleeping. 7 MP3 Songs in this album (57:48) ! Related styles: ELECTRONIC: Ambient, NEW AGE: Ambient People who are interested in Brian Eno Thom Brennan should consider this download. Details: These tracks were originally composed between 2005-2007. They were remastered Jan-Feb 2009 for this CD. They were compiled here because they represent my earliest efforts at creating ambient music, and because, in many ways, they remain among my best. Certainly, among my listeners, they remain among their top favorites. This collection is dedicated to those early listeners, as a way of saying thank-you, for all their encouragement and feedback. Bio: In late 2005, Phillip discovered the power and realism of virtual instruments and began incorporating them with his own hardware-based sound designs. Within a few months, he was recording and sharing his compositions. In 2008, he was honored as a Featured Artist at Stillstream.com. His music has appeared on several netlabels and netlabel compilations. His second full-length ambient CD, "Still Point," is now available at CDBaby. "Still Point" features an hour-long set of eight soothing and relaxing tracks. His first CD, "Amorphous Worlds," is also available on CDBaby.
