A new compilation for those that like hip-hop, downtempo, breaks, ambient, jazz fusion, Cuban, R&B and world fusion genres. 13 MP3 Songs HIP HOP/RAP: Hip Hop, ELECTRONIC: Down Tempo Details: There was a time when it all made sense. Everything. It all seemed to coalesce into an emotion, a philosophy, an understanding of what could be possible. Those idealistic days, they fade. And when they do, it's as if you're out in a frozen pond by yourself, just watching the ice schism beneath you, with no where to go but down. This is where The Change Up is to begin. It is at this time when desperation sets in, regarding the circumstance, that all begin to evolve; moving into a new idea of what is possible. This is when the Untapped eschew the convention and set forth a new channel of thinking, embracing all that is moving forward while firmly rooted in the foundation of an auditory tradition. Untapped Sounds delivers a new compilation with artists sonorously detailing the depths of music with passion. Recapturing a day and time when it did make sense, while questioning the reasoning of today's music on a grander scale, this compilation will evoke the sounds of early hip-hop, as well as display the possibilities of mind-bending music for the future. With a palate as full as this, The Change Up, will take the listener on an excursion of what music is and where it can flow. With all the emotion involved on The Change Up, it is a wonder that all music doesn't take on a context like this as a whole. Untapped Sounds is about closing the chasm between the vast genres of music and creating a new movement in sound that will allow the listener to understand the differences with appreciation. The Change Up is about instilling a new emotion, a new philosophy, and a new thought of what is possible. Compilation artists include: GB (Sound in Color), Presto (Concrete Grooves), The Earl (Footlong Development), Choice37, StresOne, Captions (Formerly Longevity Crew), Lauren Santiago, Nosaj Thing, Bobby Johnson, Johnson Jonson (OX), Freddie Joachim, and Uglie.
