Neo Art-rock meets a swirl of 'edge' rock. If Coldplay had a baby with STP and Jane's Addiction, raised by Radiohead 10 MP3 Songs ROCK: Modern Rock, ROCK: Psychedelic Details: A year in the making, a lifetime in the music...Jason Roach, musical visionary releases this self-titled CD, Project X S as an offering of depth, passion, and extreme experience of pain and pleasure to the 'n-th' degree. A vast array of sonic indulgences can be traced through this ten-song recording, with such styles as Jane's Addiction, Stone Temple Pilots, The Verve, and Radiohead to name as some of the artists homage. With studio and live engineer Michael 'Buzz' Buzzinski of Buzz Bizz Studios at the helm, this CD has great potential to break the mold of the 'neo-psychedelic' world of 'edge' rock.
