Debut from former STEEL PROPHET guitarist... Full of well thought out arrangements, awesome groove and melody, and of course, blistering shred when the moment arises. 10 MP3 Songs ROCK: Instrumental Rock, METAL: Instrumental Metal Details: Jimmy Williams, began playing guitar at the age of 13. His formal years began with lessons from his father, who began showing Jimmy various licks and barre chords. It wasn't long before he discovered Eddie Van Halen and performed "Eruption" in his high school talent show during his sophomore year. A few years later Jimmy happened upon a new discovery, a young Swedish virtuoso by the name of Yngwie J. Malmsteen. At this point Jimmy began feverishly practicing 6 hours a day to get his chops up to par with the flood of Shrapnel style neoclassical guitarists that began to flood the scene. In college, while obtaining his B.S. in Electrical engineering, Jimmy played in jazz big bands, combos, and studied classical / flamenco guitar. In 1994 Jimmy was selected to be featured in Guitar Magazine's "Resume Column" and moved to Los Angeles to pursue a career in music. After playing in numerous L.A. bands, Jimmy took a two-year hiatus from music to train with many Ultimate Fighting Championship fighters, including legends such as Bas Rutten and Marco Ruas. After a few injuries Jimmy realized that guitar playing and MMA don't quite mix and decided to pursue a musical journey once again. In 2000 Jimmy answered the call and joined Nuclear Blast Records Recording Artists Steel Prophet. In 2001 the band released the highly acclaimed album "Book of the Dead" and completed full tours of America and Europe. In August of 2001 we signed Mr. Williams to a two-album deal. Jimmy's first release for Progressive Arts Music is titled "Guitar Concepts". The album is comprised of 10 songs that were recorded on a 4-track recorder from 1999-2000. The album is full of well thought out arrangements, awesome groove and melody, and of course, blistering shred when the moment arises. "Guitar Concepts" is a creative journey through various moods, styles and time signatures. About the

material, Jimmy had this to say: "I try to keep an open mind because I believe all musical styles have something to offer. My primary goal is to write music that is both enjoyable for me to play and also entertaining to musicians and non-musicians alike. I hope you enjoy it."
