"In It for the Drama" is all about the lyrics. Lisa Locke is a poet, and her songs tell stories sometimes so true it hurts. 10 MP3 Songs ROCK: Acoustic, FOLK: Modern Folk Details: Lisa Locke is currently living and making music in the Boston area, but her songs are influenced by the time she has spent on three continents in a wide variety of conditions. She learned to play the guitar, and started writing songs, while teaching English with the Peace Corps in Far Eastern Russia. Two years as the only native English speaker in a town 10,000 miles from home gave her a lot of time alone with herself, and the intensely introspective songs on "In It for the Drama" were mostly written during that time. Lisa started her writing career as a poet, so her lyrics are tight and rich with imagery. Her melodies, probably Russian-influenced, often favor minor keys. Some have said they have a Celtic feel. "In It for the Drama" was produced by Sammy James, with the talented Sean Dennehy on acoustic guitar. If you are interested in Lisa's work, more information, including lyrics, is available on her website, lisalocke.net.
