

Mp3 Ray Woodruff - Nosefloss

[DOWNLOAD HERE](#)

Live solo acoustic guitar and voice performance with finger style instrumentals. English folk and country blues meet in songs of love and death (mostly love). 14 MP3 Songs FOLK: Modern Folk, FOLK: Alternative Folk Details: NoseFloss is a collection of acoustic and vocal tunes that represent 2007 so far. About half of the tunes were written since the move to Virginia. The history of the Burg tends to inform several of the songs: warn wood shingles, tin roofs, ghost railroads and Burnside and his Blues and Grays. And the amazing, haunting, endless dark at night, away from the shores of Lake Michigan. This is more of an album of guitar work than BigEyedMuse. The guitar drives many of the tunes and is solo in 4 of them. I choose this point as a cut off for the collection because the style is changing again, making a little more room for the voice now that I have discovered that I do, in fact, enjoy singing. (Just a note: the album titles have nothing to do with the music. They are the original working titles of the artwork that is used as cover art. The artwork has been previously used on the web with the very creative titles of: Songs 2005, Songs 2006, etc)
