

Mp3 Timeship - Spacewalk (from Eden To Mars)

[DOWNLOAD HERE](#)

A mixture between Ambient, Space, Techno and Progressive Electronica with SFXs and radio dramatizations 12 MP3 Songs ELECTRONIC: Ambient Details: WE CAL IT MULTISTYLE. CRITICS CALL IT SCI-FI MUSIC. 1. TIMESHIP doesn't have one standard style of music! 2. What we do is an mixture everything varying between: * Ambient * Electronica (mainly Progressive Symphonic, but also Experimental and * Space * Soundtracks (for movie, radio, and audiobooks) * Soundscapes (and moods) * Techno * Trance * Art Rock * Soft Jazz * SFX (Sound Effects) incl. movie-like effects and dolby surround tricks with 3D-sound * New Age (bits of what's not always "occult music") * Spoken Word (radio dramatizations, known also as audiobook illustrations and/or documentary clips) * etc. In short, Ambient Navigator called our style "sci-fi music." We love to sound like ambient and electronica, but in fact we sound rather like movie soundtracks. Each and every track has its own style, demanded by the theme we portray. There are even some folk elements involved from all over the world. Well, hear our tracks and make your conclusions. Sometimes the "standard" styles are like those heavy gold-plated frames required from the galleries to sell your paintings, whether you're a modernist like Picasso and Mark Shagal or a classic like Rembrandt and Rubens. That's a tradition we love to breaking. Our Official Website is at timeshipstudio.com, which beside a home to our MP3 demos, is also hosting our Wallcracks Music Competition, Radiodrama/Audiobook Talents Page and some Music Theory Papers, etc.

Godspeed! Boris Vicky TIMESHIP Studio 03/03/2003
