# Mp3 Tom Pomposello - [once Were] The Pastures Of Plenty

Eclectic instrumental urban blues funk new age meets Godzilla in this acclaimed, ground-breaking cd, back on the market after being unavailable for several years. 12 MP3 Songs BLUES: Electric Blues, EASY LISTENING: Mature Details: Tom Pomposello, (1949-1999) master slide guitarist, guru of the classic Nickelodeon sound ("Nick Nick Nick Nick Nick Nick Nick"), producer of world class CD's, wacky animation director, and consummate New York bluesman,conceived [once were] The Pastures of Plenty as a cure to the Wonderbread of new age music that he felt needed some help. He worked with composer and keyboardist Art Labriola on the writing of the CD, and then enlisted stellar artists in their own right, Bruce Ditmas on drums and Randy Landau on bass. Together they prove that when the good get jammin', the jammin' gets good! [once were] The Pastures of Plenty doesn't have a genre. It makes its own as witnessed by the story that Tom used to tell: The President of a large record company (which shall remain unnamed) called Tom to say that he had declined the opportunity to market the CD because it really didn't have a niche and would therefore be too expensive to promote. However, he wanted to know if Tom would mind sending him another copy. It seems that he and his wife were fighting over who got to keep the CD in their car CD player. Well, Tom just shook his head and sent the guy another CD. [once were] The Pastures of Plenty enjoyed a reasonable success in Europe but was never able to get past the distribution hump in this country. However there are a great number of fans of the CD who will be glad to know that it is available again. From the masterful infectiously rockin Tumblin' and Rollin' (a spin off of the classic blues tune Rollin' and Tumblin') to the liquid groove of Like Running Water, this CD will keep your foot tapping. Put it in your car and you will keep it there for a long time. Caution: This CD may become addictive!
