Production: Quality of Recording 4/5 Overall Rating 4/5 Positive Comments: Definitely something that could be used in a video game. Constructive Comments: Not very original. I'd check to see how close this sounds to other copyrighted tracks in the video market before pitlching it. ----- Reviewer Stats -----

Production: Quality of Recording 4/5 Overall Rating 4/5 Positive Comments: I like the feel of the song and how you mixed up the arrangement before it got too repetitive. Has a good beat. Constructive Comments: I'm not crazy about the sound the comes in around 2:30.... it sounds just a little harsh. I would have like to hear more of a fade out at the end, it ends too abruptly i think. ----- Reviewer Stats -----

On Review: This may not be breaking any new ground, but I found this very compelling. It really had me jammin'. Nice, I like it. URL of review: artistserver.com/reviews/remotemain.cfm?RID=3243 --Fevertech on 05/23/2005, ArtistServer.com ----- 311: Organs and

synths... An interesting mix of musical forms here. A kind of neo-classical sound paired with a very mechanical electronica/techno beat. I like the synthesized church organ and the harsh plucked string sounds over the bouncy electronic drums. A decent amount of variety keeps the piece from getting stale over 5 minutes. Downsides were few and minor. I would've liked maybe a bit more theme and variations throughout and a bit less repetition. Some dynamics would've helped as well, varying the volume for dramatic effect at key points would've added more interest. URL of review:
