

Paths To Dark Energy

[DOWNLOAD HERE](#)

1;Preface;5 2;1 The start of the paths;13 2.1;1.1 Newton s absolute space and time;13 2.2;1.2 Light versus absolute space and time;14 2.3;1.3 Space-time events and intervals;16 2.4;1.4 Space-time measurements and Lorentz transformations;18 2.5;1.5 The Minkowski diagram;20 3;2 General Relativity: apparent acceleration of gravity;27 3.1;2.1 Gravitation as an apparent force;27 3.2;2.2 Principle of Equivalence;283.3;2.3 Lagrangians and motion of bodies;29 3.4;2.4 Integrals of motion;30 4;3 Tests of General Relativity;32 4.1;3.1 The Schwarzschild metric and the gravitational redshift;32 4.2;3.3 Orbits in General Relativity;36 4.3;3.2 Deflection of light;42 5;4 Curved space in cosmology;48 5.1;4.1 Non-Euclidean geometries;48 5.2;4.2 Curvature of 3-space;51 6;5 Finite versus infinite universe in space and time;61 6.1;5.1 Observation of an isotropic universe;61 6.2;5.2 A finite universe in time;61 6.3;5.3 The age of the universe via its oldest objects ;62 6.4;5.4 Observational discovery of the expanding universe;66 6.5;5.5 Problems with the Hubble constant and the age of the universe;74 7;6 Cosmology and the first appearance of dark energy;78 7.1;6.1 A first formulation of dark energy: Einstein s finite static universe;78 7.2;6.2 Cosmological redshift and Friedmann s evolving universes;80 7.3;6.3 The Hubble constant in the Friedmann standard model;83 8;7 Einstein s equations, criticai density and dark energy;89 8.1;7.1 Introduction;89 8.2;7.2 The path to Einstein equations with the cosmological constant;89 8.3;7.3 Interpretations of the cosmological constant;97 9;8 Modei Universes;100 9.1;8.1 Friedmann equation;100 9.2;8.2 The Einstein-de Sitter universe (critical density Friedmann case with no dark energy);102 9.3;8.3 The de Sitter universe (introduction dark energy with no matter);105 9.4;8.4 The Concordance Model (both matter and dark energy so $k = 0$);105 9.5;8.5 Testing via the small scale Newtonian limit;109 9.6;8.6 Newtonian cosmology and the k parameter;112 10;9 Dark energy discovered;115 10.1;9.1 The era of zero-Lambda models;115 10.2;9.2 Cosmological angular-diameter distance estimates;116 10.3;9.3 Cosmological standard candle distance estimates;120 10.4;9.4 More luminous standard candles;121 10.5;9.5 Observational discovery of dark energy;124 10.6;9.6 Type Ia supernovae redshifts and distances vs uniform expansion;126 10.7;9.7 Could it be some problem with the standard candle method?;130 10.8;9.8 Modified gravity theories;132 11;10 Relics: cosmic microwave

background (CMB) photons and neutrinos;135 11.1;10.1 The prediction and discovery of the CMB;135 11.2;10.2 The Big Bang components;136 11.3;10.3 The early radiation-dominated universe;139 11.4;10.4 Properties of cosmic microwave background radiation;142 11.5;10.5 Why a CMB thermal spectrum?;146 11.6;10.6 Relic neutrinos and O;157 12;11 Baryonic matter;160 12.1;11.1 Why matter and not also anti-matter?;160 12.2;11.2 Big Bang Nucleosynthesis prediction and processes;163 12.3;11.3 Baryon nucleosynthesis abundances and cosmological implications;165 12.4;11.4 The baryon content of cosmic systems;167 12.5;11.5 The Lyman alpha forest;168 13;12 Discovering dark matter;173 13.1;12.1 Dark matter in the Milky Way disk near the Sun;173 13.2;12.2 Dark matter discovery in clusters via the Virial Theorem;176 13.3;12.3 Subclusters in rich Clusters of galaxies;181 13.4;12.4 Dark matter discovery in Clusters via the Cluster gas;183 13.5;12.5 Dark matter in the Milky Way disk and its halo;187 13.6;12.6 Dark matter discovery inside disk galaxies via rotation curves;192 13.7;12.7 Dark matter discovery in the Local Group;194 13.8;12.8 Dark matter in binary Galaxy systems;197 13.9;12.9 Dark matter discovery via gravitational lensing;200 13.10;12.10 Dark matter in different scales;214 13.11;12.11 The importance and nature of dark matter versus baryonic matter;216 14;13 Dark matter and baryonic structures;218 14.1;13.1 Newto EAN/ISBN : 9783110258783 Publisher(s): De Gruyter Format: ePub/PDF Author(s): Byrd, Gene G. - Chernin, Arthur D. - Teerikorpi, Veli P.
