

Sustainable Bioenergy And Bioproducts

[DOWNLOAD HERE](#)

From the contents: 1.Linear Hydrocarbon Producing Pathways in Plants, Algae and Microbes.- 2. Fungal Treatment of Crop Processing Wastewaters with Value-added Co-products.- 3. Fungal Biosorption of Ni (II) Ions.- 4. Biomass Pretreatment for Biofuel Production.- 5. Second-generation Biofuel Production from Corn-ethanol Industry Residues.- 6. Bio-renewable Asphalt Modifiers and Asphalt Substitutes.- 7. Sustainable Utilization of Bio-fuel Co-Product in Roadbed Stabilization.- 8. Microbial Fuel Cells for Bioenergy and Bioproducts.- 9. Bioeconomy and Transportation Infrastructure Impacts: A Case Study of Iowa s Renewable Energy.- 10.Assessing the Environmental Risks and Opportunities of Bioenergy Cropping.- 11. Key Issues in Life Cycle Assessment of Biofuels. EAN/ISBN : 9781447123248
Publisher(s): Springer, Berlin, Springer, London Discussed keywords: Bioenergie, Biologische Produkte
Format: ePub/PDF Author(s): Gopalakrishnan, Kasthurirangan - Leeuwen, Johannes van - Brown, Robert C.
