

Mp3 Dan Pound - Liquid Planet

[DOWNLOAD HERE](#)

Deep Zone meditation ethno space music 17 MP3 Songs ELECTRONIC: Ambient, NEW AGE: Meditation
Details: Another Deep Zone ambient electronic ethno space collection from DAN POUND. Liquid Planet is absorbing, meditative, searing and soaring. Music for Inner and Outer space. Sounds like Steve Roach, Micheal Stearns, Tangerine Dream and Vidna Obmana. Using a wide collection of ethnic instruments, synths, processors, voice, and percussion; it is a whole different sound that may cause the listener to be transported to a higher level of consciousness. earBuzz Review: Dan Pound's 17-track CD, "Liquid Planet", is an ambient electronic collection of pads, strings, and environmental sound tapestries that are intended to relax and inspire. The title track, "Liquid Planet", reminds us of the cosmos with a liquid center. Track 3, "Through the Layers", begins with a sawtooth pattern with oscillating and perculating sounds as the multiple figures and voices combine. Track 4, "Moment with the Machines", is an eerie rotating mix. Track 10, "Dark Star", brings in a bit more percussion than previous tracks. There's an opening and closing vocoder sounding element that supports the sparse hits and stabs. Our favorite track, "Above and Below", grooves a bit - with a dance loop that supports Pound's experimental keyboard work. The sum total is a record of mystery that could provide interesting ambiance to a life or a soundtrack. . or both. Earbuz.net
