Acoustic Folk Rock 30 MP3 Songs ROCK: Folk Rock, POP: Folk Pop Details: This record is special because it captured exactly what made my Long Wong's acoustic shows so great, the audience. If you were at that show then your on a record! If you had ever been to one of my solo acoustic shows at Long Wong's, then you'll feel right at home. People are connecting with this record on many levels. Even if you've never seen me play, everyone has seen their favorite local artist in their favorite local bar, jam packed with fellow music lovers. My days of playing solo acoustic shows at Long Wong's really shaped my career. It quickly became about more than just me and my music. It was the connection I had with the audience, and the connection the audience had with each other. I love that people came through the door from every walk of life and for two or three hours nothing on the outside mattered. It was fun to watch people that stumbled in for the first time, and see them look around the room with eyes wide, wondering where the hell they were. That fever grew after I moved to Portland, and now I see that same look on the faces of the musicians I've been touring with every time we leave Phoenix. I've been wonderfully blessed by the people who've connected with my music and have shared it with their friends. This record is everything that I'm about today. It was made for, with the help of, and dedicated to the listeners.
