Haunting melodies and honey like vocals set to ambient grooves. 10 MP3 Songs POP: New Wave, ROCK: Americana Details: WAG is a five-piece band comprised of musicians and sophists, Hell-bent on delivering the best possible product to the jaded 21st century music fan. WAG was formed in Spring 2001, when a girl named York sought guitar instruction for the purpose of writing music for her original songs. She happened upon Jeff J. Findley, a prolific musician who was coincidentally looking for a Lyricist/ Vocalist to bring his original music to life. The rest as they say is history. York and Findley's collaboration on the song "Drown" made it apparent that a full length album was a necessity and writing and recording continued for the next two years. Having completed the album, which is due for release in the spring of 2004, the next logical step was to begin live show and tour production. The band that has been assembled is formidable to say the least. * Vocals: York a voice brimming with seductive, intellectual verve. York's performance is electric and engaging serving up a feast of feeling for the audience. * Guitar: Jeff J. Findley Findley presents a virtuoso performance with equal reverence to melody and relentless pulsating drive. * Guitar: Adam Strauss. A stage performance full of animalistic intensity and musical prowess. * Bass Guitar: Anthony Fagundes steeped in classic blues bass, Anthony "T-Bone" Fagundes brings comfort and solid rhythm to the American table. * Drums: Lucas Ventura a pure 'soul' drummer with a keen sense of space and tone. A percussive force.
