

Ferroelectric Thin Films

[DOWNLOAD HERE](#)

Theoretical Aspects of Phase Transitions in Ferroelectric Thin Films.- Chemical Solution Deposition of Layered-Structured Ferroelectric Thin Films.- PB-Based Ferroelectric Thin Films Prepared by MOCVD.- Spontaneous Polarization and Crystal Orientation Control of MOCVD PZT and Bi₄Ti₃O₁₂-Based Films.- Rhombohedral PZT Thin Films Prepared by Sputtering.- Scanning Nonlinear Dielectric Microscope.- Analysis of Ferroelectricity and Enhanced Piezoelectricity near Morphotropic Phase Boundary.- Correlation between Domain Structures in Dielectric Properties in Single Crystals of Ferroelectric Solid Solutions.- Relaxor Behaviors in Perovskite-Type Dielectric Compounds.- Artificial Control of Ordered/Disordered State of B-Site Ions in Ba(Zr,Ti)O₃ by a Superlattice Technique.- Physics of Ferroelectric Interface: An Attempt to Nano-Ferroelectric Physics.- Preparation and Property of Ferroelectric-Insulator-Semiconductor Junction Using YMNO₃ Thin Film.- Improvement of Memory Retention in Metal-Ferroelectric-Insulator-Semiconductor (MFIS) Structure. EAN/ISBN : 9783540314790
Publisher(s): Springer, Berlin Discussed keywords: Magnetband Format: ePub/PDF Author(s): Okuyama, Masanori - Ishibashi, Yoshihiro
