

Microbial Technologies In Advanced Biofuels Production

[DOWNLOAD HERE](#)

From the contents: Biofuels, the larger context.- Hydrogen production: light driven processes; cyanobacteria.- Hydrogen production: light driven processes; green algae.- Hydrogen production : photofermentation.- Hydrogen production : dark processes.- Microbial Electrolysis: Novel Biotechnology for Hydrogen Production from Biomass.- Combined Processes for maximum substrate conversion.- Syntrophic Degradation of Fatty Acids by Methanogenic Communities.- Anaerobic digestion as an effective biofuel production technology.- Advanced Bioethanol Production.- Novel strategies for production of medium and high chain length alcohols.- Microbial Production of Fatty-Acid Based Biofuels.- Biodiesel production by microalgae. EAN/ISBN : 9781461412083 Publisher(s): Springer, Berlin, Springer US Discussed keywords: Biologische Kraftstoffe, Mikrobiologie Format: ePub/PDF Author(s): Hallenbeck, Patrick C.
